ABSTRACT

Web access functionality is embedded in a device
to enable low cost widely accessible and enhanced
user interface functions for the device. A web
5   server in the device provides access to the user
interface functions for the device through a device
web page. A network interface in the device enables
access to the web page by a web browser such that a
user of the web browser accesses the user interface
10   functions for the device through the web page.
